

Y25

DESCRIPTION

The Y25 double is the best-selling boat of the Eurodiffusion range since our start with coastal rowing in 1994. It was thought to evolve with the rower, from initiation to competition and it never disappointed. New design, fine curves for a powerful boat, well balanced and cut for speed. Like its little sister, the versatility of this boat has made it an asset for everyone. Its structure is reinforced by partitions (PU/glass or PVC/carbon) that ensures its unsinkability but also gives the structural rigidity to row straight and be able to have fun surfing the waves. Its new equipment is a plus: adjustable fixed riggers +3/-3 cm or possibility of tilting riggers. With this new model, succession is guaranteed !

VERSION CLUB

Realization by wet way or in contact / soric sandwich + expanded PVC / epoxy glass, partitions and fills.

VERSION CARBONE

Wet or contac production, soric sandwich + epoxy carbon PVC / carbon partitions and reinforcements
